I’m honored to receive the 2016 pre doctoral fellowship in informatics. The award will allow me to focus on research without worrying about funding, and will provide me with access to additional resources that will help accelerate my work. Receiving this award reinforces my belief that my research is exciting and impactful; it also strengthens my ability to secure research grants for the rest of my career.

DANIEL OREPER, Ph.D.
University of North Carolina at Chapel Hill
Pre Doctoral Fellowship in Informatics
2017 Awards in Informatics

The PhRMA Foundation funds scientists at critical points in their research careers to support and reward innovation in disciplines essential to the development of safe and effective medicines. The PhRMA Foundation offers competitive pre and post doctoral fellowships, sabbatical fellowships, and research starter grants to advance science in Adherence Improvement, Clinical Pharmacology, Health Outcomes, Informatics, Pharmaceutics, Pharmacology/Toxicology, and Translational Medicine and Therapeutics.

Over the past 50 years, the PhRMA Foundation has helped thousands of scientists advance their careers and has inspired new generations to enter biopharmaceutical research. The early-career support provided by the PhRMA Foundation has been a catalyst for our scientists to become leaders in their organizations and fields. Our programs help build a larger pool of highly-trained researchers to meet the growing needs of academic institutions, the government and the research-intensive pharmaceutical industry.

PhRMA Foundation award recipients will continue to play an instrumental role in substantial achievements in medicine for the benefit of public health and ultimately the patient.

Area of Interest

INFORMATICS: The goal of the Informatics Program is to promote the use and development of informatics in an integrative approach towards the understanding of human biological and disease processes. Informatics awards will support career development of scientists engaged in research that significantly integrates cutting-edge information technology with advanced biological, chemical, and pharmacological sciences in such areas as:

Genetics
• Molecular
• Medical (human)
• Pharmaco
• Population

Genomics
• Functional
• Structural
• Toxico
• Pharmaco
• Comparative

Systems Biology
• Pathways and networks
• Integrative biology
• Modeling and simulation

Molecular Epidemiology

Proteomics

General Information

ELIGIBILITY CRITERIA: All applicants must be U.S. Citizens or permanent residents of the U.S. Before an individual is eligible to apply for a PhRMA Foundation award, an applicant must have a firm commitment from an accredited U.S. school or university. Necessary documentation is described under the specific awards on the website.

APPLICATIONS: All application components are listed on the website. www.phrmafoundation.org. Online applications and required hardcopy materials must be completed and submitted by September 1, 2016. Applications will not be accepted after the deadline date. Visit our website for detailed information regarding: use and care of laboratory animals; ethical considerations; required reporting; termination; and other relevant information.

All applicants will be notified no later than December 15, 2016.
