ALERT

Supporting research and early career endeavors of scientists in drug discovery and development

>Championing Women in Life Sciences and Health Care

To commemorate the 150th year of Marie Curie's birth, a new public engagement project, supported by the PhRMA Foundation, has been launched to document the many contributions women have made to the life sciences and health care.

The project is being led by [WhatIsBiotechnology](#), an independent non-profit educational organization that brings together stories about the sciences, people and places that have enabled biotechnology to transform medicine and the world we live in today.

As part of the project, Dr. Lara Marks, the managing editor of WhatIsBiotechnology, is seeking the views of researchers in the field. Dr. Marks would welcome the brief thoughts of PhRMA Foundation alumni and stakeholders in response to the following question:

'What do you see as the most important challenge for women in the life sciences and health care?'

All comments can be sent to lara@whatisbiotechnology.org.
