*Supporting research and early career endeavors of scientists in drug discovery and development*

---

## ***Applications Are Now Available for Several 2019 PhRMA Foundation Awards***

The PhRMA Foundation today published application materials for three 2019 award programs:

- [Health Outcomes](#)
- [Translational Medicine and Therapeutics](#)
- [Clinical and Translational Pharmacology](#)

Deadline for these awards is **February 1, 2019**. Recipients of awards will be notified no later than **April 15, 2019**. The PhRMA Foundation requires that all applicants have a firm commitment from a U.S. university or institution. The Foundation is no longer requiring that applicants be U.S. citizens.

Our [Health Outcomes](#) program offers pre- and post-doctoral fellowships and research starter grants. Health Outcomes Research spans a broad spectrum of issues from studies evaluating the effectiveness of a particular pharmaceutical intervention to the impact of reimbursement policies on the outcomes of care. It also ranges from the development and use of tools to perform patient-based assessments to analyses of the best way to disseminate the results of outcomes research to providers or consumers to encourage behavior change.

Our [Translational Medicine and Therapeutics](#) program offers post-doctoral fellowships and research starter grants. The goal of the program is to promote the development and use of experimental and computational methods in an integrative approach towards clinical needs in diagnosis, treatment and prevention. Translational Medicine and Therapeutics awards advance training and support career development of scientists engaged in research that significantly integrates cutting-edge technologies with advanced biological, chemical, and pharmacological sciences and engineering methodologies. Emphasis will be placed on the identification of unmet clinical needs and the development of new experimental and computational approaches and technologies that facilitate the translation of research data into an elucidation and understanding of human biological and disease processes to directly support their solution.

Our [Faculty Development Award in Clinical and Translational Pharmacology](#) supports clinical and basic scientists committed to pursuing a career in clinical-translational pharmacology involving both research and training. Award recipients will receive two years of support at \$120,000 per year. Ideal physician candidates will have at least two years of training at the residency level and two years of clinical experience in a research training program related to clinical pharmacology and translational medicine. Non-

physician candidates must show experience and opportunity for highly collaborative work with clinicians and patient populations.

Our [Paul Calabresi Medical Student Fellowship in Clinical and Translational Pharmacology](#) enables medical or dental students who have substantial interests in research and teaching careers in pharmacology/clinical pharmacology to pursue a specific research effort within a pharmacology or clinical pharmacology unit.

For more information or to apply, visit the PhRMA Foundation website, [www.phrmafoundation.org](http://www.phrmafoundation.org). You may also call **202-572-7756**.

We encourage Foundation alumni and other stakeholders to consider applying and to forward this announcement on to colleagues who may be interested!
