PhRMA
FOUNDATION

ALERT

Supporting research and early career endeavors of scientists in drug discovery and development

Reminder: Applications Are Due Feb. 3 for Translational Medicine and Health Outcomes Research Awards

Applications for two PhRMA Foundation 2020 award programs are now available and the deadline for applying is **February 3, 2020**. The programs are **Health Outcomes Research** and **Translational Medicine**.

Note that all applications must be returned to the PhRMA Foundation by 11:59 PM EST on February 3. This includes the application submission and any reference letters of support.

Award recipients will be notified by April 15, 2020.

The PhRMA Foundation requires that all applicants have a firm commitment from a U.S. university or institution. The Foundation is no longer requiring applicants be U.S. citizens.

Our **Health Outcomes Research** program offers pre- and post-doctoral fellowships and research starter grants. Health Outcomes Research spans a broad spectrum of issues, from studies evaluating the effectiveness of a particular pharmaceutical intervention to the impact of reimbursement policies on the outcomes of care. It also ranges from the development and use of tools to perform patient-based assessments to analyses of the best way to disseminate the results of outcomes research to providers or consumers to encourage behavior change.

Our **Translational Medicine** program offers post-doctoral fellowships and research starter grants. The goal of the program is to promote the development and use of experimental and computational methods in an integrative approach towards clinical needs in diagnosis, treatment and prevention.

Translational Medicine awards advance training and support career development of scientists engaged in research that significantly integrates cutting-edge technologies with advanced biological, chemical, and pharmacological sciences and engineering methodologies. Emphasis will be placed on the identification of unmet clinical needs and the development of new experimental and computational approaches and technologies that facilitate the translation of research data into an elucidation and understanding of human biological and disease processes to directly support their solution.

The PhRMA Foundation is using **ProposalCentral** for its grant application process. This system requires you to create a profile and associate yourself with a U.S. university or research institution. The link for the process is <https://proposalcentral.com/>. Should you have questions when creating your profile, please contact customer service at pcsupport@altum.com or 703-964-5840. All applications and letters of support are due by

February 3, 2020.

For more information or to apply, visit the PhRMA Foundation website, www.phrmfoundation.org. You may also call **202-572-7756**.

We encourage Foundation alumni and other stakeholders to consider applying and to forward this announcement on to colleagues who may be interested!
