Patient-reported Outcomes in Quality Measurement

PRO

PROM

PRO-PM

patient-reported outcomes

Information on the patient, told by the patient, without interpretation

instrument, tool, single-item measure

Means to collect information told by the patient without interpretation

PRO-based performance measure

Means to aggregate information shared by the patient and collected into a reliable, valid measure of performance

EXAMPLE: Patient with Clinical Depression

Symptom: depression

Patient Health Questionnaire (PHQ-9[©]), a standardized tool to assess depression

Percentage of patients with diagnosis of major depression or dysthymia and initial PHQ-9 score >9 with a follow-up PHQ-9 score <5 at 6 months (NQF #0711)
